(54) Title: CABLE CONNECTOR AND METHOD FOR ASSEMBLING SUCH A CONNECTOR

(57) Abstract: The invention relates to a cable connector (1) for a plurality of cables (7, 8), wherein each of the cables (7, 8) comprises at least one conductor and a shielding. The connector (1) comprises a cover (2) and at least one connecting means (32) for electrically connecting the shielding and the cover (2). The connector further comprises a holder (24) for at least one of the connecting means (32) and at least one pressure means (27) adapted to develop contact pressure between the connecting means (32) and the cover (2). Preferably the pressure means (27) relate to flexible mechanical means, such as a clamp and/or clip and/or spring and/or a lever. The invention also relates to a ferrule holder (24) and a method for assembling a cable connector (1).
